

Kishore

Senior .NET Engineer | Azure | Enterprise & Distributed Systems

Chennai / Coimbatore, India | kishoremano2000@gmail.com

Professional Summary

Enterprise software engineer with nearly five years of experience designing, delivering, and supporting production platforms across identity and access management, ERP, logistics, and healthcare. Strong in C#, .NET Core, Azure-ready architecture, event-driven services, database performance, and pragmatic modernization of business-critical systems.

Core Skills

Backend	C#, .NET Core, .NET Framework, ASP.NET, ABP Framework, Entity Framework
Cloud & Messaging	Azure, Kafka, RabbitMQ, Hangfire, distributed services
Data	Microsoft SQL Server, PL/SQL, stored procedures, query optimization
Enterprise	IAM, Active Directory, ERP, logistics, clinical systems, production support

Experience

Software Consultant

Nov 2024 - Present

Tenxity Solutions, Chennai

- Architect enterprise IAM capabilities for user identities, entitlements, and access provisioning.
- Build services with ABP Framework, Kafka event streaming, Hangfire jobs, and Active Directory integration.
- Maintain legacy provisioning workflows and resolve production incidents against SLA commitments.

Software Engineer

Sep 2021 - Oct 2024

Anga Infotech, Coimbatore

- Delivered T-soft ERP modules spanning inventory, production, HR, sales, distribution, and reporting.
- Built parcel tracking and project management products with access controls and real-time notifications.
- Designed clinical software and optimized Microsoft SQL Server and PL/SQL procedures.

Selected Enterprise Work

- Identity & Access Management platform with event-driven provisioning and directory integration.
- ERP suite for plantation operations, inventory, workforce, finance, and distribution.
- Parcel, project management, and clinical systems serving operational teams.
